EXECUTIVE SUMMARY

Apex Companies, LLC (Apex) performed a Preliminary Assessment (PA) of the French's Dry Cleaners property addressed as 3706 14th Street NW, Washington, DC ("subject property"). The subject property consists of a 1,600 square foot parcel of land. Improvements on the subject property include a small, two-story retail space. The on-site building was constructed prior to 1927.

This project was performed in accordance with DC Contract #DCKG-2011-C-8444 and per the Scope of Work stated in DC RFP #DCKG-2011R-8444Rev.

Apex has performed a Preliminary Assessment in conformance with the scope and limitations of the guidance for performing Preliminary Assessments under CERCLA, September 1991 (NTIS PB92-963303, EPA 9345.0-01A) and ASTM E-1527-05 of the French's Cleaners property located at 3706 14th St NW, Washington, DC. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has revealed the following evidence of recognized environmental conditions in connection with the subject property:

- Through database review, Apex identified the subject property as a RCRA Conditionally Exempt Small Quantity Generator (RCRA-CESQG) facility and as an EDR Historic Dry Cleaner. French's Cleaners registered with RCRA to handle waste code F002 (spent halogenated solvents). The facility received two notices of general violations between 1990 and 1991. In the EDR report, the subject property was listed as a Cleaners and Dyers in 1954, 1960, and 1964. In 1960, it was listed as a Clothes Presser and Cleaner. Apex considers the dry cleaning activities currently and historically performed on site to be a REC to the subject property.
- Tunisias Dry Cleaners, addressed as 3931 14th Street NW, registered under EPA ID DCD024243362 as a RCRA-Non Generator in 1998. Two violations are on file for the facility. The property appears in the EDR Historical Dry Cleaner database as a Clothes Pressers and Cleaners in 1931, 1936, and 1940, and as a Cleaners and Dyers in 1954, 1960, and 1964. Apex considers the facility's proximity to the subject property, dry cleaning activities, and record of violations to constitute a REC for the subject property.
- Apex identified seven additional properties within 1/8 mile of the subject property as performing dry cleaning services between 1926 and 1964. The EDR Historical Dry Cleaners database identified Marvel Cleaners & Dyers (372014th Place NW), Sid S Cleaners & Laundry (3701 14th Place NW), Vogue Dry Cleaning (3616-18 14th Place NW), Cobbs Cleaners (3912 14th Place NW), Herman Myer (3915 14th Place NW), and Economy Valet Shop (3602 14th)

Place NW). Based on proximity to the subject property and the dry cleaning activities performed at the facilities, Apex considers these seven historical dry cleaners to be RECs to the subject property.

Potential for a Vapor Encroachment Condition (VEC)

The closest day care facility is listed as Growing Seeds Child Development Center, located at 3800 14th Street NW. This facility is located approximately 285 feet north of the subject property. Based on topographic maps and a visual survey of the area, this day care facility appears to be located topographically cross-gradient to the subject property. Inferred groundwater flow direct in the general area is to the west. Two USTs were removed from 3800 - 3802 14th Street NW on the northern side of the Twin Oaks apartment complex building in 1991. A LUST case is listed as open for 3800 14th Street NW. Following a file review at the DDOE - UST Branch, it has been determined that remedial efforts were still occurring as of March 2011. This case is discussed in further detail in section 4.2. **Due to the day care's close proximity to the subject property, a potential VEC for Growing Seeds Child Development Center does exist.**

According to the Guidance for Performing Preliminary Assessments under CERCLA, September 1991, this childcare facility is considered to be a Secondary Target due to its proximity to the subject property.

Recommendation

Apex recommends a Site Inspection/Subsurface Investigation of the subject property to further ascertain if historical activities at 3706 14th Street NW, Washington, DC 20011 and surrounding properties have environmentally impacted the subject property and nearby daycare facility Growing Seeds Child Development Center (3800 14th Street NW, Washington, DC 20011).

1.0 INTRODUCTION

Apex Companies, LLC (Apex) performed a Preliminary Assessment (PA) of the French's Cleaners property addressed as 3706 14th Street, Washington, DC ("subject property"). The subject property consists of a 1,600 square foot parcel of land. Improvements on the subject property include a two-story retail space. The on-site building was constructed prior to 1927.

1.1 Purpose

Apex has prepared this PA at the request of the District Department of the Environment (DDOE). The purpose of this PA is to perform all appropriate inquiries into the previous ownership and uses of the subject property consistent with good commercial or customary practice for a possible transaction involving the subject property and to permit a User to qualify for landowner liability protections as identified by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This PA was performed in order to aid the DDOE Brownfields and Voluntary Cleanup Program in determining the likelihood that the subject property is contaminated by pollutants, and subsequently whether the property warrants a response under CERCLA.

1.2 Scope of Services

This project was performed in accordance with DC Contract #DCKG-2011-C-8444 and per the Scope of Work stated in DC RFP #DCKG-2011R-8444Rev. The scope of services was to perform a PA in a manner generally consistent with the guidance for performing Preliminary Assessments under CERCLA, September 1991 (NTIS PB92-963303, EPA 9345.0-01A) as amended by Superfund Amendments and Reauthorization Act (SARA) utilizing U.S. Environmental Agency (USEPA) guidance and policies for conducting PAs, and other pre-remedial investigative activities as defined and allowed under CERCLA. A copy of the detailed Scope of Work for this project is provided as **Appendix A**.

The scope of services comprising this PA were conducted to provide a reasonable level of investigation to identify recognized environmental conditions. The term *recognized environmental conditions* (RECs) means the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of hazardous substances or petroleum products even under conditions in compliance with the laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate government agencies.

1.3 Significant Assumptions

Apex has performed the historical and environmental record searches in accordance with current US EPA guidance for PA report standards and industry practice. The data, findings, and conclusions presented in this PA are based upon a detailed search, review, and analysis of known documents and interviews, as well as observations made during the subject property reconnaissance.

Conclusions reached regarding the conditions of the subject property do not represent a warranty that all areas within the subject property are of a similar quality, as may be inferred from observable subject property conditions and available subject property history. No PA can wholly eliminate uncertainty regarding the potential for environmental liability in connection with the subject property. Apex's evaluation and analysis are intended to reduce, not eliminate, unknown conditions that could result in liability for the end user of this PA.

1.4 Limitations and Exceptions

This report was prepared as a result of a contractual agreement that defined the approach and scope of services to be employed during the course of the assessment. The opinions and conclusions expressed in this study have been based strictly on the results of these contracted services. The scope of this PA is intended to aid in the evaluation of RECs. The services provided by Apex should not be construed as a warranty or guarantee that no RECs exist at the subject property or that all recognized environmental conditions have been uncovered. No conclusions are stated or implied concerning the suitability of the subject property for its eventual use. This document is not intended for purposes other than those expressly set forth herein or for use by parties other than for whom it has been prepared.

As limited by the US EPA and Apex's Scope of Work, this PA was non intrusive in nature and did not include sampling or testing of soils, groundwater, surface water, building materials, or other materials. Additionally, Apex's Scope of Work explicitly excluded sampling for asbestos, lead-based paint, and radon, as well as determination/delineation of wetlands, regulatory compliance, cultural resources, mold, industrial hygiene, health and safety, ecological resources, endangered species, and high voltage power lines.

In an attempt to meet the prior use requirements of the guidance for performing Preliminary Assessments under CERCLA, September 1991 (NTIS PB92-963303, EPA 9345.0-01A); Apex reviewed reasonably ascertainable standard and other practically reviewable historical sources. Apex reviewed historic aerial photographs from the years 1957, 1963, 1964, 1979, 2002, and 2005; historic topographic maps from the years 1885 and 1983; and city directories for the years 1922, 1926, 1931, 1936, 1940,

1943, 1948, 1954, 1960, 1964, 1969, 1973, 1978, 1983, 1993, 2000, and 2006. Sanborn Fire Insurance maps were reviewed from the years 1916, 1927, 1928, 1959, 1960, 1977, 1984, 1985, 1988, 1989, 1990, 1991, 1992, 1995, and 1998. The Scope of Work, **Appendix A**, states that historical sources should extend back 40 years. The earliest historic source consulted that shows sufficient detail on the subject property was the 1927 Sanborn map, showing the subject property to be developed with the current structure.

At the request of the property owners, Apex did not enter the working areas of the subject property during site reconnaissance. Employees were interviewed about the current operations on the subject property, and exterior areas were inspected. Apex does not consider this to be a significant data gap to this assessment.

1.5 Special Terms and Conditions

This project was performed in accordance with the terms and conditions and limitations stated in DC Contract #DCKG-2011-C-8444 and per the Scope of Work stated in DC RFP #DCKG-2011R-8444Rev, and as stated in **Appendix A** of this Report. There are no other special terms or conditions concerning this project.

1.6 User Reliance

This Report documents the PA of the subject property performed by Apex in accordance with the DC Contract #DCKG-2011-C-8444 and per the Scope of Work stated in DC RFP #DCKG-2011R-8444Rev. This Report is prepared for use by the District of Columbia Department of the Environment (DDOE) and shall not be provided to any other person or entity without written consent by DDOE. Reliance on this report for any use or by parties other than those specifically stated is prohibited without the expressed written consent of Apex and DDOE, and such use is at the sole risk of the user.

2.0 SITE DESCRIPTION

2.1 Site Location

The subject property, French's Cleaners in Washington, DC, is identified as Square 2692, Lot 0040, in the District of Columbia tax records. The subject property is located toward the southern end of the 3700 block of 14th Street NW, between Spring Road NW and Quincy Street NW. The subject property consists of a 1,600 square foot parcel of land, which is improved with a two-story commercial space. The subject property is shown on a Site Location Map that is provided as **Figure 1**, a Site Topographic Map provided as **Figure 2**, and a Site Details Map provided as **Figure 3**.

2.2 Site and Vicinity General Characteristics

The subject property is located within a mixed-use area of Washington, DC, which consists of commercial and residential properties.

2.3 Current Site Use and Improvements

The subject property consists of a 1,600 square foot parcel of land improved with a two-story commercial space, which operates as a dry cleaning facility called French's Cleaners. The on-site building was constructed prior to 1927. Vehicular access is available from 14th Street NW, which is located adjacent to the east of the subject property, and from a rear alley accessible from both Spring Road NW and Quincy Street NW.

Washington Gas provides natural gas, while PEPCO provides electricity services to the subject property. The property is served by public sewer and water utilities, provided by the Washington Suburban Sanitary Commission.

2.4 Current Use of Adjoining and Surrounding Properties

Apex performed a reconnaissance of adjacent and surrounding properties in an attempt to identify recognized environmental conditions or potential recognized environmental conditions. 14th Street NW, which runs north-south adjacent to the east of the subject property, is lined with small commercial buildings. Immediately adjacent to the south is Delicia's Market. Immediately adjacent to the north, there is a bar. Residential communities of duplexes and single-family homes are located to the southeast, southwest, east, and northeast of the subject property. To the northwest across Quincy Street

NW, there are two large apartment complexes. Several smaller apartment buildings and residences are located to the west of the subject property.

There is one childcare facility located in proximity to the subject property. According to the Guidance for Performing Preliminary Assessments under CERCLA, September 1991, this childcare facility is considered to be a Secondary Target due to its proximity to the subject property. Growing Seeds Child Development Center is located at 3800 14th Street NW, Washington DC, 285 feet north of the subject property. The center serves approximately 50 children, from infants up to school-aged children. Two USTs were removed from 3800 - 3802 14th Street NW on the northern side of the Twin Oaks apartment complex in 1991. A LUST case is listed as open for 3800 14th Street NW. Following a file review at DDOE - UST Branch, it has been determined that remedial efforts were still occurring as of March 2011. Inferred groundwater flow direction in the general area is to the west.

3.0 USER PROVIDED INFORMATION_____

TABLE 3-1 USER PROVIDED INFORMATION					
Data Type	Information Provided				
Environmental Liens, AUL, Title Records	Apex was not provided with a completed User Questionnaire or the results of the User-conducted review of Title and Judicial Records for Environmental Liens or AULs.				
Specialized User Knowledge	Francis Egbo of DDOE was interviewed regarding the subject property. He did not have any specialized user knowledge of the site, other than that it is listed as a drycleaner with DDOE.				
Commonly Known or Reasonably Ascertainable Information	Mr. Seo Cho reported that the subject property has been in use as a dry cleaner for at least the past 10 years- current owners have been operating for the last 5 years. The building received some general renovations within the last few years. The facility uses hydrocarbon cleaning solvents, and the DCU used on site is less than 5 years old.				
Valuation Reduction for Environmental Issues	Unknown.				
Reason for Performing PA	This PA was performed at the request of DDOE.				
Other User Provided Information	Apex was not provided with any previous reports on the subject property.				

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Consistent with the guidance for performing Preliminary Assessments under CERCLA, September 1991 (NTIS PB92-963303, EPA 9345.0-01A), customary and usual practice, specific Scope of Work terms and conditions (see section 1.5), and contractual terms and conditions, Apex obtained and reviewed environmental databases and records to characterize the obvious and apparent uses of the site. Apex retained Environmental Data Resources, Inc. (EDR) to provide a database and records search report (Appendix C).

Environmental record sources required by the Scope of Work, and included in Apex's review, are listed below in **Table 4-1**. Other supplemental databases were included in the review as well. Significant and relevant findings based upon review of these documents are discussed and referenced in Section 7.0, Findings.

4.2 Additional Environmental Record Sources

Apex reviews the following additional environmental record sources during the performance of a PA at the discretion of the environmental professional. Relevant factors in determining whether additional environmental records sources should be reviewed include, but are not limited to:

- The completeness of data provided by standard environmental record sources;
- Whether additional environmental records sources are reasonably ascertainable;
- Whether additional environmental record sources are useful, accurate, and complete in light of the records review objectives, and;
- Whether additional environmental record sources are customarily obtained pursuant to the type of commercial real estate transaction involved.

RCRA Conditionally Exempt Small Quantity Generators

The database search identified the subject property as a RCRA Conditionally Exempt Small Quantity Generator (RCRA-CESQG) facility. French's Dry Cleaners is addressed as 3706 14th Street NW. French's Cleaners registered in 2003, 2002, 2000, and 1997 to handle waste code F002 (spent halogenated solvents). The facility received two notices of general violations between 1990 and 1991. Apex considers the dry cleaning activities currently and historically performed on site to be a REC to the subject property.

RCRA Non-Generators

The database search identified one facility within ½ mile of the subject property as a RCRA Non-Generator (RCRA-NonGen). Tunisias Dry Cleaners, addressed as 3931 14th Street NW, is located 0.104 miles north-northeast of the subject property. The facility registered under EPA ID DCD024243362 as a non-generator in 1998. Notices of one records/reporting violation (1992) and one general violation (1989) are on file for the dry cleaner. Apex considers the facility's proximity to the subject property, dry cleaning activities, and record of violations to constitute a REC for the subject property. Four additional RCRA-NonGen facilities were identified between ½ and ¼ mile from the subject property. Due to the distances from the subject property, Apex does not consider the further RCRA-NonGen facilities to be RECs to the subject property.

Brownfields

The database search identified seven Brownfields between ¼ and ½ mile from the subject property. Brownfields are located at 1293 Taylor Street NW (0.299 miles northeast), 1203 Taylor Street NW (0.408 miles northeast), 4100 Kansas Avenue NW (0.413 miles east-northeast), 3910 Georgia Avenue NW (0.459 miles east-northeast), 3912 Georgia Avenue NW (0.460 miles east-northeast), 3825 Georgia Avenue NW (0.463 miles east), and 3801 Georgia Avenue NW (0.464 miles east). Due to the distances of these sites from the subject property, Apex does not consider the Brownfields to be RECs to the subject property.

Leaking Underground Storage Tanks

TABLE 4-3 LUST Cases					
Property	Address	Relative Location	Description		
Twin Oaks Apts	3800 14 th Street NW	0.034mi NNE	Case #91070- Soil and GW contaminated with heating oil in 1991. Case Open.		
Twin Oaks Apts	3802 14 th Street NW	0.035mi NNE	Case #91069- Soil and GW contaminated with heating oil in 1991. Case Closed.		
Exxon	3540 14 th Street NW	0.151mi S	Case #97085- Soil contaminated with gasoline in 1997. Case Closed.		
Cromwell Apartments	1515 Ogden Street NW	0.163mi SW	Case #93004- Soil contaminated with heating oil in 1992. Case Closed.		

TABLE 4-3 LUST Cases					
Relative Property Address Location Description					
Daro Realty Inc.	3625 16 th Street NW	0.177mi W	Case #2010005- Soil contaminated with heating oil in 2010. Case Closed.		
Ogden Gardens Apts	1445 Ogden Street NW	0.221mi S	Case #95024- Soil contaminated with heating oil in 1995. Case Closed.		
1421 Taylor Street House	1421 Taylor Street	0.227mi N	Case #99093- Soil contaminated with heating oil in 1999. Case Closed.		

The database search identified two Leaking Underground Storage Tank (LUST) cases within ½ mile of the subject property. Five additional LUST cases were identified between ½ and ¼ mile from the subject property. LUST case # 91069, addressed as 3802 14th Street NW is listed as closed (case closure letter dated 9/28/93). LUST case # 91070, addressed 3800 14th Street NW, Washington DC, is listed as open and as of March 2011 was still undergoing remediation efforts following a leak in 1991.

The leak for LUST case # 91070 occurred on August 28, 1991 from a 10,000 gallon heating oil underground storage tank (UST). This tank, along with the other UST at 3802 14th Street NW at the Twin Oaks Apartment Complex, was removed in October 1991. The site of LUST case # 91070 has been undergoing groundwater monitoring efforts, following initial removal of free product and clean-up since 1991. This site pursued case closure in October 1997, but DCRA groundwater cleanup standards were not achieved. The case still remains open, and as of March 2011, monthly monitoring, sampling, and reporting continued on the LUST case. As of October 31, 1996, 3007 gallons of oil was recovered at the site (# 91070). Groundwater flow at this site flows toward the direction of decreasing surface elevation, from the east towards the west.

Due to the inferred groundwater flow direction towards the west, any remaining free product is unlikely to affect the subject property. Apex does not consider the LUST case # 91070 to be REC to the subject property. Due to the closure of the remaining cases, Apex does not consider these six LUST cases to be RECs to the subject property.

Thirty-two additional LUST cases were identified over ¼ mile away. Due to the distances from the subject property, Apex does not consider the further LUST cases to be RECs to the subject property.

Underground Storage Tanks

The database search identified three facilities with registered Underground Storage Tanks (USTs) within ½ mile of the subject property.

- 1. Twin Oaks E. Apartments, addressed as 3800 14th Street NW, is located 0.020 miles to the north of the subject property. This address had one 10,000 gallon heating oil UST. It is listed as "permanently out of use" in the Environmental Database Report. Following a file review with the DDOE UST Branch, the tank was removed from the ground in 1991.
- 2. Twin Oaks Apartments, addressed as 3802 14th Street NW, is located 0.021 miles to the north of the subject property. According to the files at the DDOE, a 10,000 gallon heating oil UST was removed along with the tank at 3800 14th Street NW.
- 3. Randolf Towers, addressed as 3900/3902 14th Street NW (0.088 miles north-northwest of the subject property), has one 5,000 gallon heating oil UST reportedly "permanently out of use". Based on the tank status, Apex does not consider the 3900/3902 14th Street NW tank to be a REC for the subject property.

Twelve additional UST registrants were identified between ½ and ¼ mile from the subject property. Due to the distances from the subject property, Apex does not consider these further USTs to be RECs to the subject property.

Historic USTs

The database search identified one facility with historically registered Underground Storage Tanks (HIST UST) within ½ mile of the subject property. Five additional HIST USTs were identified within ¼ mile of the subject property. Historically, heating oil tanks were located at 1433 Spring Road NW (0.066 miles west), 3640 16th Street NW (0.191 miles west-southwest), 3500 14th Street NW (0.193 miles south), 3536 Center Street NW (0.193 miles south-southwest), 1456 Oak Street NW (0.223 miles south-southwest), and 4120 14th Street NW (0.243 miles north). Due to the status of the tanks and distances from the subject property, Apex does not consider these historic USTs to constitute RECs for the subject property.

EDR Historical Auto Stations

The database search identified four individual Historical Auto Stations between ½ and ¼ mile from the subject property. The facilities are listed in **Table 4-4**. Due to the distances of these facilities from the subject property, Apex does not consider the Historical Auto Stations to be RECs to the subject property.

TABLE 4-4 Historical Auto Station Properties						
Property	Address	Relative Location	Description			
Newsom S Esso Servicenter	3540 14 th Place NW	0.159mi S	Listed as a gasoline and oil service station in 1940. Listed as gasoline station in 1954 and 1964.			
Shapiro David	4021 14 th Place NW	0.167mi N	Listed as a gasoline and oil service station in 1943.			
Sixteenth Street	4001 16 th Street NW	0.234mi NW	Listed as a gasoline and oil service station in 1948. Listed as a gasoline station in 1954.			
Sixteenth Street Service Station	4001-27 16 th Street NW	0.234mi NW	Listed as a gasoline station in 1960.			
17 th St. Sunoco	1700 Benning Road NE	0.111mi WNW	Listed as an auto station in 1943 and 1960.			

EDR Historical Dry Cleaners

The database search identified the subject property, as well as fifteen additional facilities within ½ mile of the subject property as EDR Historical Dry Cleaners. The facilities are listed in **Table 4-5**.

TABLE 4-5 Historical Dry Cleaners Properties							
Property	Address	Relative Location	Description	REC Status			
Frenchs Dry Cleaners	3706/3704 14 th Place NW	Subject Property	Listed as a Cleaners and Dyers in 1954, 1960 and 1964. Listed as a Clothes Pressers and Cleaners in 1940.	Yes			
Marvel Cleaners & Dyers	372014 th Place NW	0.024mi ENE	Listed as a Cleaners and Dyers in 1954. Listed as a Clothes Pressers and Cleaners in 1940 and 1936.	Yes			
Sid S Cleaners & Laundry	3701 14 th Place NW	0.039mi SE	Listed as a Cleaners and Dyers in 1964 and 1960.	Yes			
Gem Launderers & Cleaners	3618 14 th Place NW	0.082mi SSE	Listed as a Laundry in 1954.	No			

TABLE 4-5								
	Historical Dry Cleaners Properties							
Property	Address	Relative Location	Description	REC Status				
Vogue Dry Cleaning	3616-18 14 th Place NW	0.083mi SSE	Listed as a Cleaners and Dyers in 1926.	Yes				
Lee Park Laundry	3906 14 th Place NW	0.084mi NNE	Listed as a Chinese Laundry in 1940. Listed as a Laundry in 1948, 1954, 1960 and 1964.	No				
Charlie Lee	3614 14 th Place NW	0.084mi SSE	Listed as a Chinese Laundry in 1926.	No				
Lee Wing	3611 14 th Place NW	0.087mi NNE	Listed as a Chinese Laundry in 1926.	No				
Cobbs Cleaners	3912 14 th Place NW	0.088mi NNE	Listed as a Cleaners and Dyers in 1964.	Yes				
Lee King M Laundry	3606 14 th Place NW	0.089mi SSE	Listed as a Laundry in 1964.	No				
Herman Myer	3915 14 th Place NW	0.090mi NNE	Listed as a Clothes Pressers and Cleaners in 1931.	Yes				
Economy Valet Shop	3602 14 th Place NW	0.091mi SSE	Listed as a Cleaners and Dyers in 1960.	Yes				
Lee Wing	3917 14 th Place NW	0.091mi NNE	Listed as a Chinese Laundry in 1931 and 1940. Listed as a Laundry in 1954.	No				
Lee King M Laundry	3600 14 th Place NW	0.092mi SSE	Listed as a Chinese Laundry in 1931 and 1940. Listed as a Laundry in 1948, 1954, and 1960.	No				
Randolph Cleaners & Tailors	3918 14 th Place NW	0.093mi NNE	Listed as a Clothes Pressers and Cleaners in 1931, 1936, 1940, and 1960. Listed as a Cleaners and Dyers in 1954.	Yes				
Louis Cleaners	3931 14 th Place NW	0.102mi NNE	Listed as a Clothes Pressers and Cleaners in 1931, 1936, and 1940. Listed as a Cleaners and Dyers in 1954, 1960, and 1964.	Yes				

Twelve additional Historical Dry Cleaners were identified between ½ and ¼ mile from the subject property. Due to the distance from the subject property, Apex does not consider the further facilities to be RECs to the subject property.

Orphan Properties

The search also identified 40 unique "orphan" or unmappable properties that are not geocoded but may occur within the overall vicinity. Apex reviewed the addresses and did not identify "orphan" sites on or adjacent to the subject property during the site reconnaissance.

4.3 Environmental Liens Search

An environmental lien search was not part of the scope of services for this PA.

4.4 Physical Setting Sources

According to the USGS 7.5-minute topographic map of the area (Washington West, District of Columbia, 1983), the subject property is situated on gently sloping terrain at a surface elevation of approximately 171 feet above mean sea level. Topography at the site generally slopes to the south.

The subject property is situated in northwest Washington, D.C., which is located in the Coastal Plain Physiographic Province. The north-northeast trending Fall Zone, which separates the western Piedmont and eastern Coastal Plain physiographic provinces, bisects the District of Columbia. The Coastal Plain lithology is comprised of a wedge of clastic sediments that increases in thickness from a featheredge near the Fall Zone to more than 8,000 feet at the Atlantic coastline. These sediments rest on an eroded surface of Precambrian to early Mesozoic rock.

The generally unconsolidated sediments of the Coastal Plain are primarily comprised of gravel, sand, silt, and clays. As mapped by the United States Geological Survey (USGS), the site/subject property is underlain by the Patapsco Formation and Arundel Clay of the Potomac Group. These sediments are typified as dark gray massive clay containing lignitized wood overlain by massive maroon colored clay and varicolored sand and clay units. Thickness of the Potomac Group sediments is estimated to be over 150 feet in the site area.^[1]

The natural soils and sediments in this type of urban environment have typically been disturbed at shallow depths by utility and foundation excavation activities. Generally, shallow unconfined groundwater flow is topographically controlled; however, disturbed soil horizons (backfilled utility excavations, foundation backfills, etc.) can dominate shallow groundwater flow patterns. There are no surface water features present on the property. The most proximal surface water features to the site is Rock Creek,

^[1] Johnston, Paul M., *Geology and Ground-Water Resources of Washington, D.C., and Vicinity, Geological Survey Water Supply Paper 1776, U.S. Government Printing Office, Washington, D.C., 1964.*

located approximately 1 mile west of the site. Shallow, unconfined groundwater flow in the site area is estimated to be generally south, based on topography and areal water features.

4.5 Historical Records

Apex reviewed reasonably ascertainable records documenting the history of the use and/or ownership of the subject property and adjoining properties. Details regarding specific sources of information are summarized in this section.

Aerial Photographs

Apex reviewed aerial photographs from the years 1957, 1963, 1964, 1979, 2002 and 2005.

- In the 1957 aerial photograph, the subject property is apparent in a row of approximately nine connected spaces along 14th Street NW. Spring Road NW is apparent to the south of the subject property, with residential areas beyond to the southwest and southeast. To the northwest, two large apartment buildings are shown between 14th Street NW and a small wooded area. Residential neighborhoods are located to the northeast.
- In the 1963 and 1964 aerial photographs, the subject property and surrounding areas appear similar to the 1957 aerial.
- In the 1979 aerial photograph, the subject property appears similar to the 1964 photo. Surrounding areas appear similar with the exception of a new wing added to the western side of an apartment building located to the north of the subject property.
- In the 2002 aerial photograph, the subject property appears to be similar to the 1979 aerial photograph. Surrounding properties also appear similarly, with the exception of another apartment complex addition, to the north.
- In the 2005 aerial photograph, the subject property and surrounding areas appear similar to the 2002 aerial. The area is densely developed with row homes and apartment buildings.

Topographic Maps

Apex reviewed historical topographic maps from the years 1885 and 1983.

• The 1885 topographic map depicts the subject property as undeveloped. The surrounding area is depicted as having little development.

The 1983 topographic map depicts the subject property to be in a residential area. 14th
 Street NW is depicted to the east of the subject property and Spring Street NW is to the
 south. The topographic map depicts the urban area in pink but does not depict any
 actual buildings or landmarks on the subject property or surrounding areas.

Sanborn Fire Insurance Maps

Apex reviewed certified Sanborn maps from the years 1916, 1927, 1928, 1959, 1960, 1977, 1984, 1985, 1988, 1989, 1990, 1991, 1992, 1995 and 1998 provided by EDR. The certified Sanborn maps are provided as **Appendix D**.

- The 1916 Sanborn map is does not provide coverage of the subject property. Areas to
 the northeast of the subject property are depicted, with some residential units along
 Quincy Street NW and several vacant lots. The area containing the subject property is
 not available in this map.
- The 1927 Sanborn map depicts the subject property as a retail space within a row of eleven other shops along 14th Street NW. Apartment complexes are depicted to the west and northwest. Residential units are depicted to the north and northeast across 14th Street NW. To the south, Spring Road NW is depicted running east-west. Areas to the south of Spring Rd NW and to the southeast of the subject property are not available on this map.
- The 1928 Sanborn map does not have data available for the subject property or areas to the north. To the south, 14th Street NW is depicted running north-south, with retail units along the west side of the road and residential units along the east side. Residential neighborhoods are depicted to the east and west of 14th Street NW.
- The 1959 Sanborn map shows a similarly limited area to the 1928 map. Several
 previously residential units along the east side of 14th Street NW are shown to be
 converted into retail space. Surrounding residential neighborhoods are depicted as
 similar to the 1928 map.
- The 1960 Sanborn map depicts the subject property as similar to the 1927 Sanborn Map, now labeled as a dry cleaner. The surrounding properties to the north are similar to the 1927 Sanborn Map with the exception of a new multifamily apartment building depicted along Randolph Road NW. Areas to the south of Spring Rd NW and to the southeast of the subject property are not available on this map.
- The 1977 Sanborn map depicts the subject property as an unlabeled retail unit. Surrounding areas are depicted as primarily residential neighborhoods, with retail spaces

- along 14th Street NW and additions to the two large apartment complexes to the northwest of the subject property.
- The 1984 Sanborn map does not provide coverage for the area containing the subject property or immediate surroundings. Areas to the south of the subject property are depicted as similar to the 1977 map.
- The 1985 Sanborn map shows the subject property and areas to the north as similar to the 1977 map. Areas to the south of the subject property are not available on this map.
- The 1988 Sanborn map is similar to the 1984 map in its limitations. The subject property
 and areas to the north are not depicted. To the south, units are depicted as similar to the
 1985 map.
- The 1989 Sanborn map shows the subject property as a retail unit, similar to the 1985 map. Areas to the south are not depicted. To the north, retail units line 14th Street NW, with residential units beyond to the east and apartment complexes to the west.
- The 1990 Sanborn map depicts the subject property and surrounding areas to the north as similar to the 1989 map. Surrounding areas to the south are similar to the 1988 map.
- The 1991 and 1992 Sanborn maps depicts no significant changes to the subject property or surrounding areas.
- The 1995 Sanborn map depicts the subject property and areas to the north. No data is available for areas to the south. No significant changes to the subject property or surrounding areas to the north are apparent.
- The 1998 Sanborn map shows the subject property as a retail unit, similar to the 1995 map. To the north, retail units line 14th Street NW, with residential units beyond to the east and apartment complexes to the west. No significant changes to the area are apparent.

City Directories

Historical city directories, listed by street address, are frequently useful in documenting the historical occupancy of properties in urban or otherwise incorporated areas that have a significant history of developed commercial or residential use. EDR provided historic city directories for the subject property for the years 1922, 1926, 1931, 1936, 1940, 1943, 1948, 1954, 1960, 1964, 1969, 1970, 1973, 1978, 1983, 1993, 2000, and 2006 for the address 3706 14th Street. A table summarizing the significant findings of the city directories review is included on the following page. A copy of the City Directories Results is included as **Appendix E**.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Apex representatives, Ms. Amanda Hren and Mr. David Hawkins, inspected the subject property on April 19, 2012, from approximately 12:30 p.m. to 1:00 p.m. Weather conditions at the time of the site visit were cloudy skies with a temperature of approximately 65 degrees Fahrenheit. Apex was accompanied during the site reconnaissance by Mr. Francis Egbo of DDOE. The following findings are reported as observed during the site reconnaissance. Resumes of Apex personnel involved in this project are included as **Appendix F** and site photographs are provided as **Appendix G**.

The site reconnaissance consisted of an exterior walk-through of the subject property and exterior areas of the surrounding buildings. Apex was unable to enter the interior of the subject property beyond the front counter to view the equipment area at this time. The business owner requested that Apex schedule a time with the manager to visit when the DCU machines are off, to prevent liability issues with the Apex team during a walk-through. Apex spoke with the property owner regarding the operation of dry cleaning units within the building. The interior space consists of a one-story retail space with a small basement.

5.2 Site Setting and Observations

The subject property is located within a mixed-use area in Washington, DC, which consists of commercial and residential properties. The subject property is approximately 1,600 square feet of land improved with a two-story commercial space. The building where 3706 14th Street is located was constructed prior to 1927. The on-site improvements and utilities were previously discussed in Section 2.3 and the findings from the site reconnaissance are discussed in Section 7.0.

6.0 INTERVIEWS and FREEDOM ON INFORMATION ACT (FOIA) REQUESTS_

Apex submitted Freedom of Information Act (FOIA) requests with individuals knowledgeable about the subject property and adjoining property use as listed below. Other information provided in interviews is incorporated into the appropriate sections of this report. FOIA requests were submitted to the following agencies:

Mr. Ibrahim Bullo – District of Columbia Department of the Environment (DDOE)

Mr. Andrew Beaton – District of Columbia Fire & EMS Department

Copies of the FOIA requests submitted and responses received are provided in **Appendix H.**

District of Columbia Department of the Environment (DDOE)

A file review was conducted at the DDOE - UST Branch for addresses 3800 14th Street NW and 3802 14th Street NW, Washington D.C., LUST case #'s (91069 and 91070). Information regarding these LUST cases is discussed in Section 4.0.

District of Columbia Fire & EMS Department

In a response dated May 9, 2012, Mr. Gerald Pennington responded on behalf of the District of Columbia Fire and EMS Department. Mr. Pennington reported that DC Fire & EMS no longer maintains records of hazardous materials. A record search was conducted for 3706 14th Street NW and it is reported that there are no current or outstanding fire code violations for the property at this time.

Interviews

While Apex was unable to do an interior walk-through of the subject property, Apex did speak with the current tenants regarding the type and use of dry cleaning units and solvents. Apex also spoke with the tenants about disposal of used solvents. The current manager of French's Dry Cleaners is Mr. Seo Cho, interviewed during the site reconnaissance of the subject property at 12:30pm on April 19, 2012.

Mr. Cho stated that French's Dry Cleaners uses a hydrocarbon based solvent in their one dry cleaning unit (DCU). He said that the unit is less than five years old, and that the machine it replaced was installed by the previous owner. Mr. Cho had no information regarding the previous dry cleaning unit.

Mr. Cho stated that the facility receives a shipment of solvent approximately every eight months, in 55 gallon deliveries. He also stated that there is a secondary containment area around the on-site

DCU, consisting of a built-in tray at the base of the machine. Apex was unable to confirm this statement, due to inability to view the equipment area.

Mr. Cho stated that he had no knowledge of any dry cleaning solvent spills during his occupancy at French's Dry Cleaners. He stated that cartridge filters are used and drained in their sealed housings for at least eight hours before removal. He also stated that machine maintenance and appropriate repairs are made in accordance with pollution prevention practices by a third party company.

Mr. Cho stated that the facility uses MCF Systems, based out of Ellenwood, Georgia, as the licensed waste transporter for hazardous waste, and that no wastewater is discharged into surface water from the property.

7.0 FINDINGS

7.1 Historical Site Activities

Based on review of limited reasonably ascertainable historical records, Apex concludes the subject property was primarily undeveloped before the 1920s.

According to interviews and historical documents reviewed, a drycleaner, identified primarily as French's Cleaners has operated at 3706 14th Street NW since the early 1940s. French's Cleaners is listed in the historical drycleaners database and also as a current RCRA-CESQG. According to the property owner, French's Dry Cleaners is an active drycleaners. Two recorded incidents have been reported at the facility. Apex considers the historic dry cleaning performed on site as well as its current operation as a dry cleaner to be a REC to the subject property.

7.2 Current Site Activities

The subject property consists of a 1,600 square foot parcel of land improved with a two-story commercial shopping space, currently in operation as French's Dry Cleaners (**Appendix G, Photograph 1**). The on-site building was constructed prior to 1927. Vehicular access is available from 14th Street NW, which is located adjacent to the east of the subject property. A rear alleyway is accessible from Quincy Street NW and Spring Road NW. The subject property has a concrete surface at the rear of the building that is in good condition. This area is fenced off from the adjacent alleyway. The distance of unpaved surfaces from the rear of the subject property is approximately 70 to 80 feet.

7.3 Off-Site Activities

The development around the subject property consists primarily of residential communities (**Appendix G, Photographs 5** and **6**). Commercial properties line 14th Street, which runs north-south along the eastern edge of the subject property. The property immediately adjacent to the south appears to be an international market (**Appendix G, Photograph 2**). Immediately to the north, there is a small bar (**Appendix G, Photograph 3**).

7.4 Storage Tanks

During the site reconnaissance, Apex did not observe any above ground storage tanks (ASTs) or underground storage tanks (USTs) at the subject property. Because Apex was unable to do a walk-

through of the majority of interior spaces, it is unknown if there are any ASTs or USTs inside the subject property.

7.5 Hazardous Substances and Petroleum Products

During the exterior observations of the subject and adjacent properties, Apex did not observe any obvious petroleum substances or storage. Apex did observe the presence of three storage drums, two mop buckets, an out-of-use washer or dryer unit, and several fans, at the rear of the subject property (**Appendix G, Photograph 8**). The materials were stored within a locked fenced area, and Apex was unable to get a closer look at these drums. The drums are used as storage for solvent awaiting removal by 3rd party hauler MCF.

The known waste disposal and transportation practices of this property were discussed previously in the Section 6.0, along with interview responses from the current dry cleaner manager.

7.6 Solid Waste

While Apex was unable to enter the waste storage area, it is assumed that the solid waste generated at the subject property included waste, such as paper, cans, bottles, food, and cardboard boxes, etc. Solid waste is stored in an on-site dumpster and on-site trash can until it is picked up by contracted haulers for off-site disposal (**Appendix G, Photograph 7**). No unusual staining or odors were observed in the vicinity of the dumpster and trash can during the site reconnaissance.

7.7 Polychlorinated Biphenyls (PCBs)

Fluorescent lights are used to illuminate portions of the on-site buildings. U.S. EPA regulations require that fluorescent light ballasts manufactured after July 1, 1978, contain no PCBs and be labeled as such. Fluorescent light ballasts located in the subject property building were not accessible. Based on the age of the building (constructed around the 1920s and renovated within the past 10 years), it is possible that the fluorescent light ballasts at subject property may contain PCBs. Apex did not observe indications of leaking ballasts during the site reconnaissance.

Apex did not observe other equipment likely to contain PCBs, such as transformers, generators, hydraulic elevators or lifts on the subject property during the site reconnaissance.

7.8 Drains and Sumps

Apex did not observe any floor drains or sumps in the customer areas of the subject property. It is unknown whether floor drains or sumps are located in treatment areas of the facility.

7.9 Wastewater and Septic Systems

Apex did not observe additional sources of wastewater or liquid discharge into the sewer other than sanitary sewage. Wastewater is discharged into sinks, which are connected to the sanitary sewer system. The subject property is provided with public sewer utilities, and Apex did not observe indications of current or historic septic systems on the subject property during the site reconnaissance.

7.10 Wells

During the site reconnaissance, Apex did not observe groundwater monitoring wells at the subject property.

7.11 Other Physical Evidence of Contamination

Apex did not observe other physical evidence of contamination such as waste pits, ponds, or lagoons during the site reconnaissance of the exterior areas.

8.0 CONCLUSIONS AND OPINIONS

Apex Companies, LLC (Apex) performed a Preliminary Assessment (PA) of the French's Cleaners property addressed as 3706 14th Street NW, Washington, DC ("subject property"). The subject property consists of a 1,600 square foot parcel of land. Improvements on the subject property consist of a two-story retail space. The on-site building was constructed in prior to 1927.

This project was performed in accordance with DC Contract #DCKG-2011-C-8444 and the Scope of Work stated in DC RFP #DCKG-2011R-8444Rev. The scope of services was to perform a PA in a manner generally consistent with the guidance for performing Preliminary Assessments under CERCLA, September 1991 (NTIS PB92-963303, EPA 9345.0-01A) and ASTM E-1527-05.

Data Gaps

Apex was unable to conduct a full interior walk-through of the subject property on April 19, 2012, at the request of the property owner due to liability concerns. However, based on the limited site reconnaissance, historical sources review, and interviews, Apes does not believe this data gap is significant and does not change the opinions or findings of this report.

Potential for a Vapor Encroachment Condition (VEC)

The closest day care facility is listed as Growing Seeds Child Development Center, located at 3800 14th St, NW. This facility is located approximately 285 feet north of the subject property. Based on topographic maps and a visual survey of the area, this day care facility appears to be located topographically cross-gradient to the subject property. **Due to the close proximity to the subject property, a potential VEC for Growing Seeds Child Development Center does exist.**

According to the Guidance for Performing Preliminary Assessments under CERCLA, September 1991, this childcare facility is considered to be a Secondary Target due to its proximity to the subject property.

Apex has performed a Preliminary Assessment in conformance with the scope and limitations of the guidance for performing Preliminary Assessments under CERCLA, September 1991 (NTIS PB92-963303, EPA 9345.0-01A) and ASTM E-1527-05 of the French's Cleaners property located at 3706 14th St NW, Washington, DC. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has revealed the following evidence of recognized environmental conditions in connection with the subject property:

- Through database review, Apex identified the subject property as a RCRA Conditionally Exempt Small Quantity Generator (RCRA-CESQG) facility and as an EDR Historic Dry Cleaner. French's Cleaners registered with RCRA to handle waste code F002 (spent halogenated solvents). The facility received two notices of general violations between 1990 and 1991. In the EDR report, the subject property was listed as a Cleaners and Dyers in 1954, 1960, and 1964. In 1960, it was listed as a Clothes Presser and Cleaner. Apex considers the dry cleaning activities currently and historically performed on site to be a REC to the subject property.
- Tunisias Dry Cleaners, addressed as 3931 14th Street NW, registered under EPA ID DCD024243362 as a RCRA-Non Generator in 1998. Two violations are on file for the facility. The property appears in the EDR Historical Dry Cleaner database as a Clothes Pressers and Cleaners in 1931, 1936, and 1940, and as a Cleaners and Dyers in 1954, 1960, and 1964. Apex considers the facility's proximity to the subject property, dry cleaning activities, and record of violations to constitute a REC for the subject property.
- Seven additional properties were identified within 1/8 mile of the subject property as performing dry cleaning services between 1926 and 1964. The EDR Historical Dry Cleaners database identified Marvel Cleaners & Dyers (372014th Place NW), Sid S Cleaners & Laundry (3701 14th Place NW), Vogue Dry Cleaning (3616-18 14th Place NW), Cobbs Cleaners (3912 14th Place NW), Herman Myer (3915 14th Place NW), and Economy Valet Shop (3602 14th Place NW). Based on proximity to the subject property and the dry cleaning activities performed at the facilities, Apex considers the seven historical dry cleaners to be RECs to the subject property.

Recommendation

Apex recommends a Site Inspection/Subsurface Investigation of the subject property to further ascertain if historical activities at 3706 14th Street NW, Washington, DC 20011 and surrounding properties have environmentally impacted the subject property and nearby daycare facility Growing Seeds Child Development Center (3800 14th Street NW, Washington, DC 20011).

9.0 ENVIRONMENTAL PROFESSIONALS

9.1 Signatures of Responsible Environmental Professionals

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in § 312.10 of 40 CFR Part 312, and we have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the *subject property*. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

9.2 Qualifications of Responsible Environmental Professionals

Ms. Andrea Owen was the principal environmental professional responsible for completion of this Phase I ESA. Ms. Owen has a M.A.S. in Environmental Policy and Management and B.S. in Integrated Science and Technology with a concentration in Environmental Science and a minor in Environmental Information Systems. Ms. Owen has been performing environmental site assessment services for seven years, and is an environmental professional as defined in § 312.10 of 40 CFR Part 312.

Ms. Amanda Hren was responsible for site reconnaissance and report preparation for this Preliminary Assessment. Ms. Hren has a B.S. in Environmental Science and Technology with a concentration in Ecological Technology Design, from the University of Maryland. During her environmental consulting career, Ms. Hren has prepared reports and aided in site reconnaissance for several Phase I and Phase II ESA reports. She has been involved in all phases of environmental assessments, including literature review, site inspections, and multi-media sampling activities.

Mr. David Hawkins was responsible for site reconnaissance and report preparation for this Preliminary Assessment. Mr. Hawkins received his B.S. in Earth Science with a concentration in Geology from George Mason University. Mr. Hawkins has assisted in site reconnaissance and report preparation for other Preliminary Assessments as well.

APPENDIX A

Scope of Work

SECTION C SPECIFICATIONS/WORK STATEMENT

C.1 SCOPE:

The District of Columbia Government (the District), Office of Contracting and Procurement (OCP), on behalf of the District Department of the Environment (DDOE), Brownfield's and Voluntary Cleanup Program is seeking a qualified environmental consultant or qualified environmental contractor to perform site assessments pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended by Superfund Amendments and Reauthorization Act (SARA) utilizing U.S. Environmental Protection Agency (USEPA) guidance and policies for conducting Preliminary Assessments (PA), and other pre-remedial investigative activities as defined and allowed under CERCLA, at various sites to be referred to the Contractor by the District.

C.2 Applicable Documents

The following documents are applicable to this procurement and are hereby incorporated by this reference.

No.	Document Type	Name	Version
1	Preliminary	Guidance for Performing Preliminary	September
	Assessment Guidance	Assessments Under CERCLA,	1991or
		September 1991, (<u>NTIS</u> PB92-963303,	most

C.3 Definitions

The following terms when used shall have the following meanings:

AS Analytical Services

CERCLA Comprehensive Environmental Response, Compensation, and Liability Act

COTR Contracting Officers Technical Representative

DDOE District Department of the Environment

SARA Superfund Amendments and Reauthorization Act

OCP Office of Contracting and Procurement

PA Preliminary Assessments

USEPA U.S. Environmental Protection Agency

WA Work Assignment

C.4 BACKGROUND

The District Department of the Environment (DDOE) is responsible for the natural and indoor environments in the District of Columbia. DDOE's work includes direct assistance to residents and businesses, policymaking, and monitoring and enforcement. DDOE programs are designed to facilitate cleaner air and water, green our neighborhoods and building space, and assist with the management of hazardous and toxic waste disposal.

DDOE's Brownfield's and Voluntary Cleanup Program wishes to determine the likelihood that various sites located throughout the District of Columbia are contaminated by pollutants and whether such sites warrant a response under CERCLA.

Over the past several years, DDOE has encountered issues related to the co-location of dry cleaner facilities and childcare centers. In at least one case, vapors from a dry cleaner entered a nearby childcare center, raising concerns about possible health effects and resulting in the temporary closure of the childcare facility. For this reason DDOE has decided to proceed with a comprehensive analysis of dry cleaners in the District, with the primary focus being an assessment of known dry cleaners that are adjacent to or very close to childcare facilities. Preliminary assessments (PAs) are needed at dry cleaners chosen by DDOE. Based on the results of the PAs, the District, through a separate solicitation, may seek the performance of site investigations at sites selected by DDOE.

C.5 REQUIREMENTS

The Contractor, in accordance with USEPA CERCLA practices for PAs, shall identify potential environmental problems, concerns, and conditions associated for sites specified by DDOE. The PA shall provide a full background search of the site, including government and other available records review, interviews, site visit, and report preparation. The PAs shall identify recognized environmental conditions whose actual presence or likely presence indicate that there is an existing release, there was a past release, or there is a material threat of a release of any hazardous substance into structures on the property or into the ground, ground water, surface water, or air. Upon reviewing the immediate PA on the subject property and identifying the environmental recognized conditions whose actual presence or likely presence indicate that there is an existing release, there was a past release, or there is a material threat of a release of any hazardous substance into structures on the property or into the ground, ground water, surface water or air.

The Contractor shall deliver preliminary assessments, related environmental site assessments, or a combination of services as required.

C.5.1 Preliminary Assessment Reports

The Contractor shall conduct each PA in accordance with the USEPA practices and guidance which shall include, but not be limited to, the following major components:

- **C.5.1.1** Schedule a PA scoping meeting with the DDOE, within two weeks after contract award date.
- **C.5.1.2** A review of site records and other relevant information made available by the District, physical inspection of facilities, including a walk-through of accessible internal structures, field assessment of external areas, and site perimeter. Conduct interviews with management personnel concerning current and past equipment, processes, and procedures.
- **C.5.1.3** Conduct interviews with management personnel concerning current and past equipment, processes, and procedures.
- **C.5.1.4** Contact with appropriate regulatory agencies to obtain information on known environmental concerns in the areas.
- **C.5.1.5** A review of an Environmental Data Resources, Inc. (EDR) Radius Map with GeoCheck® environmental report consisting of District and federal databases.
- **C.5.1.6** A records and literature survey of the environmental setting, including: site geology, groundwater use, surface water, sensitive environmental areas, and adjacent commercial or industrial use.
- **C.5.1.7** Review and interpretation of aerial photographs, Sanborn Fire Insurance Maps, Historical Directories, and other historical documents for the site, extending back to 40 years. This involves the historical search of available and readily obtainable documents to determine past uses of the site, including land and improvements.
- **C.5.1.8** A review of previous assessment reports, if available.
- **C.5.1.9** Evaluation of all data collected during the assessment and shall appear in the final report as a narrative.
- C.5.1.10 The report format shall be in accordance with the USEPA Guidance for a PA report, but may be modified at the Contract Administrator (CA) request. The Contractor shall submit the PA report to the CA within two weeks of completion of each PA.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Consumer and Regulatory Affairs' District of Columbia LUST Cases list.

A review of the LUST list, as provided by EDR, and dated 01/01/2012 has revealed that there are 39 LUST sites within approximately 0.5 miles of the target property.

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/10/2011 has revealed that there are 3 RCRA-NonGen sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 141 Next Scheduled EDR Contact: 07/23/2012
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-I ke material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Elevation: 171 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 38077-H1 WASHINGTON WEST, DC

Most Recent Revision: 1983

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

WASHINGTON WEST

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

No detail available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

APPENDIX F

Resumes of Personnel

(b) (4) received her B.S. in Integrated Science and Technology with a concentration in Environment Science and a minor in Environmental Information Systems from James Madison University in Harrisonburg, Virginia. She also has her Masters of Applied Science in Environmental Policy and Management from the University of Denver. (b) (4) brings experience in Environmental Project Management as well as extensive experience in environmental sampling, environmental site assessments and remedial applications at industrial, commercial, and residential sites. (b) (4) has managed the District of Columbia's MS4 Storm Water Sampling and Analysis contract for the past three years. (b) (4) also has managed over 250 Phase I and Phase II environmental site assessments for an assortment of commercial/industrial properties involving various confidential financial institutions. Properties included warehouses, commercial offices, residential buildings, industrial facilities, abandoned farms, and undeveloped tracts. These studies have involved the identification of potential recognized environmental conditions related to petroleum or chemical spills or releases, hazardous substances, underground storage tanks, asbestos, lead-based paint, and similar environmental concerns. Ms. Owen has also performed site characterization studies for several sites in order to evaluate environmentally impacted soils for disposal upon excavation based on current waste management regulations and industry-standard construction excavation practices.

EDUCATION

- M.A.S., Environmental Policy and Management, University of Denver, CO 2011
- B.S., Integrated Science and Technology, James Madison University, VA 2004

PROFESSIONAL REGISTRATIONS / CERTIFICATION / TRAINING

- 40-Hour HAZWOPER
- 8-Hour OSHA HAZWOPER Refresher
- Confined Space Training
- 8-Hour HAZWOPER Supervisor Training
- 3-Day EPA AHERA Inspector
- 4-Hour EPA AHERA Inspector Refresher

PROJECT EXPERIENCE

NPDES MS4 Storm Water - Washington, DC: Storm Water Services

Project Manager - Collection and analysis in accordance with the storm water monitoring and analysis practices recommended by the Environmental Protection Agency (EPA) in three DC watersheds. Work Includes: Flow assessment, wet and dry event sample acquisition, field chemistry sample analyses, laboratory sample analyses, and report preparation to the DC Department of the Environment for compliance with US EPA NPDES permitting regulations.

Mitchell Junction - Colonial Pipeline, VA - VPDES Permit Renewal

Project Manager – Work Includes: Information Gathering and Coordination, this includes gathering data necessary as part of VPDES required forms, Application Form 1-General Information, Application form 2C, and Form 2 and includes creation of several site maps, narratives, discharge information, water pollution controls, hazardous materials/wastes, and other site specific details. A required sampling event of all outfalls for biochemical oxygen demand (BOD), chemical oxygen demand (COD), total organic carbon (TOC), total suspended solids (TSS), ammonia (as nitrogen), oil and grease, total nitrogen, and total phosphorous is also part of the required tasks.

Continental Teves – Culpeper, VA – Groundwater Sampling and Reporting

Environmental Scientist – Work Includes: monthly (O&M System Sampling), semi-annual groundwater monitoring, and annual groundwater monitoring events, and Permit Reporting requirements as described in the Groundwater Sampling Monitoring Program (GWSP) and the Sampling and Analysis Plan (SAP).

Andrea Owen Resume Page 2

Manassas FUDS Site - Manassas, VA: Site Investigation (SI)

Project Manager - Work includes: mapping, boring and well drilling, soil and groundwater sampling and laboratory analyses around 50 acre former Air Defense Command Radar Network Facility. Site investigation primarily focused on organic solvent and PCB contaminants. Site investigation performed to acquire data for risk and feasibility studies to comply with USEPA and Virginia DEQ regulations.

Former Nansemond Ordnance Depot - Suffolk, VA: RI/FS

Environmental Scientist - Work includes: mapping, geophysical surveys, boring and well drilling, soil and groundwater sampling and laboratory analyses around former ordnance disposal areas to supplement site characterization data for completion of a remedial investigation / feasibility (RI/FS) study for compliance with CERCLA regulations.

Monaca Air Force POL - Monaca, PA: Site Investigation

Environmental Scientist - Work includes: mapping, geophysical surveys, boring and well drilling, soil and groundwater sampling and laboratory analyses around five 1.7 million gallon USTs and over 3 miles of ancillary pipelines and blending USTs for initial environmental assessment for decommission of the fuel storage and distribution system. Work performed to comply with USACE and Pennsylvania regulatory requirements.

Northeast Property Assemblage - Washington, DC: Phase I and Phase II ESA

Project Manager/Environmental Scientist - Work includes: Phase I and Phase II (PI/PII) investigations of commercial/ industrial property assemblage in Brentwood area of Northeast DC for the Office of the Deputy Mayor for Planning and Economic Development. Tasks include: site reconnaissance, historical data review, mapping, utility location, asbestos surveys, lead paint surveys, boring and well drilling, soil and groundwater sampling and laboratory analyses around automobile repair bays, petroleum tanks, and other suspect site areas for determination of environmental site conditions and assessment of financial requirements for site remediation prior to property acquisition by the District of Columbia.

Constitution Square – Washington D.C.: Environmental Services

Project Manager - Work Includes: Site characterization study, mapping, boring and well drilling, soil and groundwater sampling and laboratory analyses, contaminated soil excavation monitoring.

Commercial Properties SE - Washington D.C.: Phase I and Phase I ESAs

Project Manager - Work Includes: Several Phase I and Phase II Environmental Site Assessments (ESA) around the National Baseball Stadium in southeast DC. Tasks include: site reconnaissance, historical data review, mapping, utility location, asbestos surveys, lead paint surveys, boring and well drilling, soil and groundwater sampling and laboratory analyses around several automobile filling stations and commercial properties and other suspect site areas for determination of environmental site conditions and assessment of financial requirements for site remediation prior to property acquisition by the District of Columbia.

Northern VA Radon Studies - Northern VA.: Environmental Services

Environmental Scientist - Work Includes: Radon measurement services for a several of commercial properties in the northern Virginia area for a variety of clients. Tasks include: site reconnaissance, followed air quality testing procedures, interpretation of lab data, and reporting procedures.

Washington D.C. Schools - Environmental Services

Project Manager - Work Includes: Radon surveys, Phase I and Phase II ESAs, visual mold and asbestos surveys for private and public schools located within and around the District of Columbia. Tasks include: site reconnaissance, historical data review, mapping, utility location, asbestos surveys, lead paint surveys, and visual mold inspections.

EDUCATION

B.S., Environmental Science and Technology/Ecological Technology Design, University of Maryland, 2010

PROFESSIONAL REGISTRATIONS/ CERTIFICATION/ TRAINING

- 40-Hour OSHA HAZWOPER Certification #111112153115
- Mobile Equipment Operator (B561 CB Forklift) Certification #R5C0353126
- 3-Day EPA AHERA Project Designer Certification #118247

PROJECT EXPERIENCE

D.C. Department of the Environment- Washington, DC: Preliminary Assessments

Staff Scientist: Assist in preparing preliminary assessments for current and historic dry cleaning facilities in the Washington D.C. area. Work Includes: Site investigations, historical data review, and report preparation to the DC Department of the Environment.

Clark Realty - Fort Belvoir, VA: Life Safety and Health Inspections

Staff Scientist: 100% inspection of residential units on the Fort Belvoir Army Base, for environmental and life safety concerns. Work Includes: Physical inspection of residences, report preparation to Clark Realty Capital.

Continental Tire - Culpeper, VA - Groundwater Sampling and Reporting, ISCO Treatment

Staff Scientist – Bi-annual ISCO treatment of contaminated groundwater, as well as semi-annual groundwater monitoring and annual groundwater monitoring events, as described in the Groundwater Sampling Monitoring Program (GWSP) and the Sampling and Analysis Plan (SAP). Work Includes: Field sample acquisition, field chemistry sample analyses, laboratory sample analyses, well monitoring during in-situ treatment procedures.

NPDES MS4 Storm Water – Washington, DC: Storm Water Services

Staff Scientist – Assist in collection and analysis in accordance with the storm water monitoring and analysis practices recommended by the Environmental Protection Agency (EPA) in one DC watershed. Work Includes: Flow assessment, wet and dry event sample acquisition, field chemistry sample analyses, laboratory sample analyses, and report preparation to the DC Department of the Environment for compliance with US EPA NPDES permitting regulations.

GENERAL EXPERIENCE

2011 - Present Staff Scientist, Apex Companies, LLC, Manassas, VA.

On-Site Data Collection - Participate in field data collection events, prepare samples for laboratory analysis under strict COC requirements. Water sampling, soil coring, groundwater parameters, field testing. Use YSI units, photoionization detectors, DTW indicators, ISCO samplers, peristaltic pumps, field colorimeter units.

Document Editing and Proofing - Compose, edit, and design documents and tables for company use, including proposals and Phase I/II ESA reports.

2010 – 2011 Environmental Specialist, Leo Sunergy Corporation.

Installation Design Work - Compose to-scale 2D and 3D solar system designs for proposal purposes.

Post-Contract Customer Support - Invoicing, installation scheduling, subcontractor scheduling, communication of permitting and installation progress, completing full paperwork process for state/county grant programs, utility net-metering, and SREC trading.

Document Editing and Proofing - Compose, edit, and design documents and presentations for company use, including proposals, internal information sheets, RFP responses, newsletters, and correspondence.

2009 Research Intern, Alliance for Green Heat.

Database and Industry Research - Perform extensive research on state biomass heat policy and funding (DSIRE and THOMAS), attend Senate and House informational hearings arranged by industry and environmental groups.

Content Development and Editing - Write extensive copy for growing website, site maintenance (Dreamweaver), compose and design newsletters (Constant Contact). Proofread and edit all correspondence and documents prior to publication

Grant and Donation Program Support - Process and record incoming grant and donation funding for the nonprofit, compose and edit grant request documents, donation correspondence, and thank you letters to previous donors. Manage donor information in MS Excel.

Mr. Hawkins received his B.S. in Earth Science with a concentration in Geology from George Mason University in Fairfax, Virginia. Mr. Hawkins has assisted with visual on-site life safety and health inspections, identifying possible mold growth and water damage issues, fire hazards, and overall safety concerns within homes on the Fort Belvoir, VA United States Army Base. Mr. Hawkins has experience with Phase 1 ESA report writing and on-site investigations. Mr. Hawkins also has assisted with MS4 stormwater inspections throughout Prince William County, Virginia.

EDUCATION

• B.S., Earth Science, concentration in Geology, George Mason University

• Geology Field Course, South Dakota School of Mines and Technology

January 2012 June 2011 – July 2011

PROJECT EXPERIENCE

Clarke Realty—Fort Belvoir, VA: Life Safety and Health Inspections
Environmental Intern: Assist with on-site inspections and office related work, January 2012 – April 2012

D.C. Department of the Environment: Preliminary Assessments
Environmental Intern: Assist in PA site investigations and report preparations of dry cleaning facilities in the Washington D.C. area, April 2012 - Present

APPENDIX H

FOIA Requests and Responses

April 16, 2012

Mr. Ibrahim Bullo Freedom of Information Act Officer D.C. Department of the Environment 1200 1ST Street, NE 5TH Floor Washington, DC 20002

Dear Mr. Bullo:

This letter is to request under the Freedom of Information Act any environmental-related information concerning air emissions permits, records of reported releases, enforcement actions, or underground storage tanks for the following sites:

- French's Dry Cleaners 3706 14TH Street NW Washington, D.C. 20011
- Marvel Cleaners and Dyers 3720 14TH Street NW Washington, DC
- Vogue Dry Cleaning Co 3616-18 14TH Street NW Washington, DC
- Cobbs Cleaners 3912 14TH Street NW Washington, DC

Apex commits to paying up to \$25 for fees DDOE incurs in responding to this FOIA request. Thank you for any information you may supply Apex Companies, LLC concerning this location.

Environmental Intern

DISTRICT DEPARTMENT OF THE ENVIRONMENT UNDERGROUND STORAGE TANK BRANCH FREEDOM OF INFORMATION ACT REQUEST REPORT

TO: David Hawkins

FROM: Donal Harden, Program Support Assistant: (202) 299-3322, donal.harden@dc.gov

CC: Ibrahim Bullo, Interim FOIA Officer (202) 535-2506

DATE: May 9, 2012

FOIA #: DDOE#120427UST

FOIA APPLICATION DATE: April 19, 2012

A review of the UST-LUST Branch files reveals the following information regarding the requested

property(ies):

FACILITY ADDRESS	FACILITY NAME	UST/SOC FILE Y/N	UST FACILITY ID	LUST/ VRAP FILES Y/N	VRAP#	LUST#	LUST CASE OPEN/ CLOSED

Environmental Intern Apex Companies

Mr. Hawkins:

This is in response to your Freedom of Information Act request for records of hazardous materials. Please be advised that the D.C. Fire & EMS no longer maintains these records; the D.C. Department of the Environment does. You may contact them directly at www.ddoe.dc.gov.

An extensive search was conducted on the various locations you cited and there are NO current or outstanding Fire Code violations at this time.

Acting Custodian of Records 202-673-3397
